ACUO TECHNOLOGIES® NAMES Mike Dolan VICE PRESIDENT of SALES

ST. PAUL, Minn., September, 2007 – Acuo Technologies®, a company specializing in the development of high-performance grid software for intelligent medical image management, DICOM and storage virtualization, as well as data migration tools and services announces the appointment of healthcare IT industry veteran Mike Dolan to lead the sales and business development efforts “Powered by Acuo™”. For over 15 years, Dolan has been actively assisting healthcare IT entities transition to the digital domain and in leveraging their healthcare IT infrastructure solutions by sharing information across all levels in the healthcare enterprise.

“We are extremely pleased to recruit and bring onboard someone with Mike’s background and expertise to Acuo” stated Jeff Timbrook, CEO of Acuo. “With Mike Dolan onboard and our previous announcement of Michael Simon, Acuo is quickly assembling one of the best sales leadership teams in our industry. We are fortunate to have Mike on the team; he is one of the best I have worked with as he brings integrity, intensity and a great knowledge base to Acuo”

Dolan was most recently a Senior Director of Sales with Emageon Inc. where he successfully helped design, manage and sell benefits of an integrated healthcare solution while working with partner channels, producing a high impact solution selling strategy. His customers represent many of the top healthcare facilities. Prior to Emageon, Dolan held a number of Sales and Marketing positions with Eastman Kodak’s Health Imaging Division. Recently, Mike obtained an Executive MBA in International Business from the KATZ School of Business, University of Pittsburgh.

“What attracted me to Acuo Technologies is their ability to assist both end users and PACS providers in improving performance and overall customer satisfaction” stated Dolan “The engineering and management at Acuo Technologies are focused on partner benefits as well as recognizing and designing solutions for the end user. Acuo Technologies is intent on providing tools and solutions to our partners so that they may focus on areas where they bring greater value to their corporation and the customer. Acuo enables open standards to store, manage and make DICOM images and related content available to all hospital applications anywhere anytime.”

About Acuo Technologies

Acuo Technologies, with headquarters in St. Paul, MN, was founded in 2000 with the

objective of developing the first enterprise-wide collaborative asset management solution for medical DICOM images residing in a Picture Archiving and Communications System (PACS). Its first commercial product received U.S. Food and Drug Administration 510-K approval in 2001. Since that time, over 140 implementations around the world have deployed AcuoMed/AcuoStore™ software solutions. For more information, visit www.acuotech.com.

DICOM is the registered trademark of the National Electrical Manufacturers Association for its standards publications relating to digital communications of medical information.
